What makes an Eynesbury Geographer?

What is Geography?

Geography is the study of the physical features of the earth and the study of how humans impact on the earth.

Physical geography includes learning about mountains, rivers, climate zones, water cycle etc.

Human geography includes learning about types of settlement, land use, economic activity etc.

Why is Geography an important subject?

- Geography helps us to explore and understand different places and spaces.
- Geography helps us to understand how the world works.
- It helps us to learn about and celebrate diversity.
- We can learn how we interact on the environment and the impact we can have on the earth.
- We can find out about current events.
- Geographers analyse trends which helps plan for the future.

How will learning Geography help me?

- It can help us to learn about the importance of making sustainable choices.
- It can help us to become more tolerant of other beliefs and cultures.
- We can learn skills that help us to analyse information from a variety of sources and how to present this information in different ways.
- We can learn how to solve problems that we might be faced with in the future.
- We can learn skills that could help us to have an interesting career.

What careers might a Geographer have?

- Cartographer
- Urban planner
- Environmental manager
- Sustainability consultant
- Geoscientist
- Researcher
- Geography teacher or lecturer
- Travel agent
- Population analyst
